

TABLE OF CONTENTS

	Page
ACKNOWLEDGEMENTS	
1. INTRODUCTION	1
2. REVIEW of LITERATURE	3
2.1 OESTRADIOL HORMONE	3
2.1.1 Pituitary Gonadal Relationship during the Oestrus Cycle	3
-Oestradiol level during the oestrus cycle	6
2.1.2 Pituitary Gonadal Relationship during Pregnancy	9
-Oestradiol level during pregnancy period	11
2.1.3 Pituitary Gonadal Relationship during Postpartum	15
-Oestradiol Level during postpartum period	18
2.2 PROLACTIN HORMONE	23
2.2.1 Pituitary Gonadal Relationships	23
2.2.2 Prolactin Level during the oestrus cycle	26
2.2.3 Prolactin Level during Pregnancy Period	29
2.2.4 Prolactin Level during Postpartum Period	33
2.3 Relationship between Milk Production and Oestradiol Hormone	36
2.4 Relationship between Milk Production and Prolactin Hormone	38
2.5 MILK PRODUCTION	41
2.5.1 Milk Yield and Lactation Period	41
2.5.1.1 Means	41
2.5.1.2 Effects of Non - genetic Factors	41
2.5.1.3 Cow effect	51
2.5.2 Bi- weekly milk yield	51
2.5.3 Reproductive Traits	52
2.5.3.1 Means	52
2.5.3.2 Effects of Non - genetic Factors	58

3. MATERIALS AND METHODES	65
3.1 Experimental animals and management	65
3.2 Blood sampling for hormonal assay	67
3.3 Radioimmunoassay of hormones	68
3.4 Data and its Sources	70
3.5 Statistical Analysis	71
3.5.1 Physiological part	71
3.5.2 Productive part	72
4. RESULTS AND DISCUSSION	75
4.1 PHYSIOLOGICAL PART.	75
4.1.1 Serum oestradiol level in nonpregnant cows	75
4.1.2 Serum oestradiol level in pregnant cows	79
4.1.3 Serum oestradiol level in postpartum cows	82
4.1.4 Serum prolactin level in pregnant cows	85
4.1.5 Serum prolactin level in postpartum cows	88
4.1.6 Serum oestradiol and milk yield	92
4.1.7 Serum Prolactin and milk yield	96
4.2 PRODUCTIVE PART	98
4.2.1 Milk Production Traits	98
4.2.1.1 Actual Means and Variation	98
4.2.1.2 Non-Genetic Effects	100
4.2.1.3 Cow effect	105
4.2.2 Bi-Weekly Milk Yield	106
4.2.3 Repeoductive Traits	114
4.2.3.1 Actual means and variation	114
4.2.3.2 Non-genetic effects	116
4.2.3.3 Cow effect	120
5. SUMMARY	121
6. REFERENCES	125
