|--------------------------------------------------------------------------------------------------|-----------|
| <b>1. INTRODUCTION .....</b>                                                                     | <b>1</b>  |
| <b>2. REVIEW OF LITERATURE .....</b>                                                             | <b>3</b>  |
| 2.1. Physiological factors affecting rooting .....                                               | 3         |
| 2.1.1. Effect of cultivar on root ability of cuttings .....                                      | 3         |
| 2.1.2. Effect of planting dates on rooting of cuttings .....                                     | 6         |
| 2.1.3. Effect of shading on rooting of cuttings .....                                            | 11        |
| 2.1.4. Effect of indole butyric acid (IBA) on rooting of<br>cuttings .....                       | 15        |
| 2.2. Rotting in relation to cutting contents of phenols and<br>indoles .....                     | 23        |
| 2.3. Anatomical structure of the cutting in relation to root<br>initiation and development ..... | 27        |
| <b>3. MATERIALS AND METHODS .....</b>                                                            | <b>32</b> |
| <b>4. RESULTS AND DISCUSSION .....</b>                                                           | <b>37</b> |
| 4.1. Rooting of olive cuttings .....                                                             | 37        |
| 4.1.1. Rooting percentage .....                                                                  | 37        |
| 4.1.2. Number of roots/cutting .....                                                             | 43        |
| 4.1.3. Root length .....                                                                         | 48        |
| 4.1.4. Survival percentage .....                                                                 | 52        |
| 4.1.5. Number of shoots .....                                                                    | 56        |
| 4.1.6. Shoot length .....                                                                        | 62        |

|                                                                              |            |
|------------------------------------------------------------------------------|------------|
| 4.1.7. Leaf area .....                                                       | 66         |
| 4.1.8. Leaf length .....                                                     | 71         |
| 4.1.9. Leaf width .....                                                      | 75         |
| 4.2. Rooting in relation to cutting contents of phenols and<br>indoles ..... | 79         |
| 4.2.1. Total phenols .....                                                   | 79         |
| 4.2.2. Total indoles .....                                                   | 82         |
| 4.3. Anatomical studies .....                                                | 86         |
| <b>5. SUMMARY AND CONCLUSION .....</b>                                       | <b>101</b> |
| <b>6. LITERATURE CITED .....</b>                                             | <b>106</b> |
| <b>7. ARABIC SUMMERY .....</b>                                               |            |
