

Contents

NO.	Item	Page
1	INTRODUCT	1
2	REVIEW OF LITERATURE	3
2.1	Definition of composting and compost	3
2.2	Basic Methods of Compost Production	4
2.2.1	According to aeration	5
2.2.1.1	Aerobic composting	5
2.2.1.2	Anaerobic composting	5
2.3	Composting Methods	6
2.3.1	passive aeration piles	6
2.3.2	Turned windrow piles	7
2.3.3	Aerated static pile	8
2.3.4	In-vessel composting	8
2.4	General Principles of Composting	9
2.5	Organic Composting Material	10
2.6	Preparation of Compost Feedstock	12
2.7	Composting Structures	13
2.7.1	Static pile	13
2.7.2	Windrow	13
2.7.3	Pile structure	14
2.7.4	Oxygen	15
2.7.5	Moisture	15
2.7.6	Nutrient Availability	15
2.7.7	Temperature	16
2.7.8	Pile turning	17
2.8	Important Factors Affecting Compost Process	17
2.8.1	Temperature	17
2.8.2	Moisture content	19
2.8.3	Aeration	19
2.8.4	Acidity (pH)	21
2.8.5	Carbon to nitrogen ratio (C/N)	21
2.8.6	Compost recipe calculator	23
2.8.7	The required time for composting	23
2.8.8	Remixing / turning intervals	24
2.8.9	Particle size	24

2.9	Compost Properties	25
2.9.1	Physical properties of compost	25
2.9.1.1	Temperature in compost	26
2.9.1.2	Particle size	26
2.9.1.3	Moisture content	27
2.9.1.4	Density and bulk density	27
2.9.1.5	Aeration	28
2.9.1.6	Porosity and air space	29
2.9.1.7	Electrical conductivity	29
2.9.2	Chemical properties of compost	30
2.9.2.1	C/N ratio	30
2.9.2.2	Nutrient balance	31
2.9.2.3	(PH) Acidity	31
2.9.2.4	Cation exchange capacity (CEC)	32
2.9.2.5	Enzyme activities	33
2.10	Compost Microorganisms	35
2.10.1	The phases of composting	35
2.10.1.1	Bacteria	36
2.10.1.2	Actinomycetes	37
2.10.1.3	Fungi	37
2.10.1.4	Protozoa	38
2.10.1.5	Rotifers	38
2.10.1.6	Pathogens	38
2.11	Compost Equipment	39
2.12	Finished Compost	40
3	MATERIALS AND METHODS	41
3.1	Materials	41
3.2	Instrumentation	45
3.3	Experimental Procedures	45
3.3.1	Static compost	46
3.3.2	Turned method (windrows)	46
3.4	Sifting Experiment.....	47
3.5	Compost Analysis	47
3.5.1	Physical and chemical analysis	47
3.5.1.1	Moisture content	47
3.5.1.2	Temperature measurement	48
3.5.1.3	Carbon dioxide	48
3.5.1.4	Bulk density	48
3.5.1.5	Odor and color	48
3.5.1.6	Organic matter (OM) and organic carbon (OC).....	48
3.5.1.7	Hydrogen ion concentration (PH)	48
3.5.1.8	Electrical conductivity (EC dS/cm)	49
