

Contents

	Page
- list of table.....	i
-list of figures.....	ii
1. Introduction.....	1
2. Review of literature.....	5
2.1.Factor Influencing the persistence of pesticide residues in soil.....	5
2.2. Bioremediation of carbamate pesticides.....	8
2.3. Bioremediation of organophosphorus pesticides.....	17
2.4. Bioremediation of pyrazole pesticides.....	42
2.5. Factors affecting on bioremediation.....	43
3 . Materials and Methods.....	50
3.1. Pesticides used.....	50
3.2. Sampling.....	51
3.3. Soil analysis.....	52
3.3.1. Mechanical analysis.....	52
3.3.2. Microbial analysis	52
3.3.3.Chemical analysis.....	53
3.4.Extraction	53
3.5.Clean up	54
4. Results and Discussion.....	57
4.1. Chemical estimation of pesticide residues.....	57
4.2. Residues analysis.....	57
4.2.1. Residues of Methomyl.....	57
4.2.2. Residues of Profenofos	67
4.2.3. Residues of Fenpyoximate.....	75
4.3 Biodegradation or bioremediation of methomyl, profenofos	

and fenpyroximate by tested biofertilizers	79
4.3.1. The role of cerialin on biodegradation of the tested pesticides residues.....	80
4.3.2. The role of rizobacterin on biodegradation of the tested pesticides residues.....	84
4.3.3. The role of microbin on biodegradation of the tested pesticides residues.....	86
4.3.4. The role of nitrobin on biodegradation of the tested pesticides residues.....	90
4.3.5. The role of phosphorin on biodegradation of the tested pesticides residues	92
5. Summary and Conclusion.....	95
6. Appendix.....	103
7. References.....	115
8. Arabic Summary.....	1
