ACKNOWLEDGEMENT	
INTRODUCTION	1
II. REVIEW OF LITERATURE	4
II.1. Synonyms of <u>Bemisia tabaci</u> (Gennadius).....	4
II.2. Ecological studies of <u>Bemisia tabaci</u> (Genn). in the world.....	6
II.3. Biology of <u>Bemisia tabaci</u> (Genn.).	30
II.4. The natural enemies of <u>B. tabaci</u> in the world.....	35
II.4.1. Predators of <u>B. tabaci</u>	35
II.4.2. <u>Bemisia tabaci</u> parasitoids	39
a. Activity and distribution of <u>B. tabaci</u> . parasitoids in the world	39
b. Biology and laboratory studies on <u>B.</u> <u>tabaci</u> parasites in the world.....	45
II.4.3. Fungi affecting <u>Bemisia tabaci</u> . (Genn.).	50
III. MATERIALS AND METHODS.....	52
III.1. Ecological studies on <u>Bemisia tabaci</u> (Gennadius).....	52
III.1.1. Population dynamics under field conditions ...	52
III.1.2. Relationship between the host plants and <u>B. tabaci</u> infestation.....	55

II

	Page
III. 2. Ecological studies on <u>Bemisia tabaci</u> natural enemies under field conditions..	56
III.2.1. Survey of <u>B. tabaci</u> natural enemies.	57
III.2.2. Evaluation of the activity of <u>B. tabaci</u> parasitoids under field conditions.	57
III.2.3. Fluctuations in numbers of <u>B. tabaci</u> parasitoids	58
III.2.4. Activity of <u>B. tabaci</u> parasitoids on another aleyrodid species.	58
III. 3. Biological and Ecological studies on <u>B. tabaci</u> parasitoids under laboratory conditions. . . .	59
III.3.1. . . Biological studies on <u>Prospaltella lutea</u> Masi (Hymenoptera : Aphelinidae).	59
a. Durations of immature stages.	60
b. Biology of <u>P. lutea</u> adults	60
c. Auto-parasitism phenomenon.	
d. Preference of <u>B. tabaci</u> stages and instars for parasitism by <u>P. lutea</u> females and effect on resultant adults	62
III.3.2. Effect of temperature and kind of food on the longevity of <u>P. lutea</u> adults	63

III

page

III.3.3.	Competition between <u>E. mundus</u> and <u>P. lutea</u> to parasitize different stages and instars of <u>B. tabaci</u> under laboratory conditions	64
IV.	RESULTS AND DISCUSSION	65
IV.1.	Ecological studies on <u>Bemisia tabaci</u> (Gennadius)	65
IV.1.1.	Population dynamics of <u>Bemisia tabaci</u> (Gennadius) under field conditions	65
	A. Frequency of occurrence and population density of <u>B. tabaci</u> on different host plants throughout two successive seasons 1983/84 and 1984/85	65
	a. Summer plantation	65
	b. Winter plantation	73
	c. Early summer plantation	81
	B. Host preference by <u>Bemisia tabaci</u> (Genn.) under field conditions	90
	C. Preference of <u>B. tabaci</u> to infest plants of different families	99
	D. Total infestation by <u>B. tabaci</u> immature stages to different host plants under field conditions	103
IV.2.	Relationship between host plant and <u>Bemisia tabaci</u> (Genn.) infestation	107
