I. INTRODUCTION	1
II. REVIEW OF LITERATURE	5
1. Pesticidal activities of plant extracts.....	5
2. Toxicity of naturally occurring plant extracts.....	11
2.1. <i>Withania somnifera</i>	11
2.2. <i>Pinus halepensis</i>	20
3. Performance of plant extract and their prepared formulations.....	23
4. Isolation and identification of plant constituents.....	30
III. MATERIAL AND METHODS.....	38
1. Tested plants.....	38
2. Preparation and extraction of plant samples.....	39
3. Insects rearing and maintenance in the laboratory...	40
3.1. <i>Culex pipiens</i> mosquitoes	40
3.2. Cotton leafworm, <i>S.littoralis</i> (Boisd).....	44
4. Bioassay tests for insecticidal activities estimation in laboratory against target insect pests.....	45
4.1. <i>Culex pipiens</i> mosquito larvae.....	45
4.2. Cotton leafworm larvae.....	46
5. Preparation of <i>Withania somnifera</i> plant extract as emulsifiable concentrate (EC).....	47
5.1. Recipes of EC formulations of <i>W.somnifera</i> in chloroform and ethanol prepared in the laboratory.....	48

	<i>Page</i>
5.1.1. EC formulation of <i>W.sonifera</i> in chloroform extract.....	48
5.1.2. EC formulation of <i>W.sonifera</i> in ethanol extract.....	48
5.2. Method of preparation of EC formulation of plant extracts.....	48
6. Determination of physico chemical properties of prepared EC formulation.....	49
7. Physico-chemical characteristics of locally formulated emulsifiable concentrates.....	51
8. Insecticidal activities of prepared EC formulations against mosquitoes and cotton leafworm larvae in laboratory.....	54
8.1. Larvicidal activity against <i>Culex larvae</i>	54
8.2. Larvicidal activity against leafworm larvae.....	55
9. Separation of crude extract components by thin layer chromatography (TLC) technique.....	56
9.1. Insecticidal activities of (TLC) separated bands against 3 rd instar larvae of <i>C.pipiens</i>	56
9.2. Gas chromatography/Mass spectrometry (GC /MS) analysis of the most active components of <i>W.somnifera</i>	57
IV. RESULTS AND DISCUSSION.....	58
1. Larvicidal activities of prepared plant crude extracts against the 3 rd larval instar of <i>Culex pipiens</i> in laboratory.....	58
1.1. Preliminary evaluation of larvicidal activities of prepared plant crude extracts in organic solvents.....	58

	<i>Page</i>
1.2. Larvicidal activities of chloroform and ethanol crude extracts of <i>W.somnifera</i> against 3rd instar larvae in laboratory.....	59
1.3. Larvicidal activities of prepared EC formulation of <i>W.somnifera</i> against 3rd instar larvae of <i>Culex pipiens</i>	65
2. Insecticidal activities of tested crude and EC formulations of chloroform and ethanol of <i>W.somnifera</i> against different instar larvae of the cotton leafworm, <i>S.littoralis</i> (Boisd) in laboratory...	69
2.1. Chloroform crude extracts of <i>W.somnifera</i>	69
2.2. Ethanol crude extracts of <i>W.somnifera</i>	75
2.3. EC/chloroform formulation of <i>W.somnifera</i>	78
2.4. EC formulation from ethanol extract of <i>W.somnifera</i>	82
3. Isolation and larvicidal activities of TLC separated chromatograms of <i>W.somnifera</i> extracts against 3 rd instar larvae of <i>C.pipiens</i> in laboratory.....	88
3.1.TLC Isolation of <i>W.somnifera</i> extract components	88
3.2. Insecticidal activities.....	88
3.3. Confirmation analysis of the most active components of <i>W.somnifera</i> by GC-MC.....	93
3.3.1. Ethanol extract.....	93
3.3.2. Chloroform extract.....	103
