	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	4
3. MATERIALS AND METHODS.....	32
4. RESULTS AND DISCUSSION	38
IV.I. Vegetative growth measurements	38
IV.I.1- Net increase shoot length	38
IV.I.2- Total number of shoot/transplant, shoot diameter and total number of leaves/transplant	39
IV.I.3- Average leaf area (cm ²)	43
IV.I.4- Top fresh weight, root fresh weight and top/root ratio.....	44
IV.II. Effect of rootstock type and different irrigation regime on some chemical constituents:.....	47
IV.II.1- Effect on leaf chlorophyll a and b contents.....	47
IV.II.2- Total carbohydrates.	49
IV.II.3- Leaf proline content	51
IV.III. Effect of rootstock type and different irrigation regime on leaf and root mineral composition.....	53
IV.III.1- Leaf and root nitrogen content.....	53
IV.III.2- Leaf and root phosphorus content.....	55
IV.III.3- Leaf and root potassium content	58
IV.III.4- Leaf and root calcium content.....	60
IV.III.5- Leaf and root magnesium content.....	62
IV.III.6- Leaf and root chloride content.....	64
IV.III.7- Leaf and root iron, zinc and manganese contents	65
IV.IV. Anatomical study:	71
IV.IV.1- Effect of water stress treatments on the root anatomy.....	71
IV.IV.2- Effect of different water regime levels on the stem anatomy.....	72
IV.IV.3- Effect of water stress treatments on Ne plus ultra leaf anatomy.....	73
5. SUMMARY AND CONCLUSIONS.....	86
6. LITERATURE CITED.....	101
7. SUMMARY IN ARABIC	-
