

TABLE OF CONTENTS

	Page
1- INTRODUCTION.....	1
2- REVIEW OF LITERATURE.....	7
2.1. Overview of reproduction and productivity of female rabbits emphasizing photoperiod effect.....	7
2.2. Natural Endocrine control of reproduction.....	11
2.3. Ovulation induction.....	17
2.4. Hormonal mechanism during ovulation.....	18
2.5. Neuroendocrine control of ovulation.....	20
2.6. Mechanism of Ovarian Follicle Rupture.....	25
2.7. Biosynthesis and biological effect of Melatonin on reproduction.....	27
2.8. Effect of Photoperiod on Melatonin Biosynthesis.....	33
2.9. Pineal gland activity and the role of melatonin in transducing photoperiodic Information.....	38
2.9.1. Pineal gland activity.....	38
2.9.2. Critical features of Melatonin secretion as affected by rhythm.....	40
2.10. Role of Melatonin in reproduction.....	46
2.11. Effect of serotonin in reproduction.....	48
2.12. Effect of human chorionic gonadotropin (HCG) on the mechanism of ovulation.....	50
2.13. Effect of sexual steroidal hormones on oogenesis and ovulation.....	52
2.14. Effect of prolactin (PRL) on oogenesis and ovulation.....	57
2.15. Bromocriptine: an ergoline derivative acts as dopamine agonist used in Hyperprolactinaemia.....	61
2.16. Prostaglandin (PG) function on uterine contraction and ovulation.....	63
2.17. Effect of indomethacin on the prostaglandin biosynthesis.....	66
3. MATERIALS AND METHODS.....	73
3.1. Grouping of animals and experimental design.....	73

3.2. Hormonal modulators applied.....	77
3.2.1. Indomethacin.....	77
3.2.2. Bromocriptine (parlodel cycloset).....	78
3.2.3. Melatonin.....	79
3.2.4. Serotonin.....	80
3.3. Injected materials.....	81
3.4. Parameters estimated and data collection.....	82
3.4.1. Blood samples collection.....	82
3.4.2. Chemicals and reagents used in chemical analysis.....	82
3.4.3. Progesterone (P4) radioimmunoassay.....	83
3.4.3.1. Assay buffers.....	84
3.4.3.2. Assay procedure.....	85
4. RESULTS AND DISCUSSIONS.....	88
4.1. First experiment.....	88
4.1.1. Serum progesterone level in untreated does subjected to different lighting regimes applied.....	89
4.1.2. Effect of HCG.....	90
4.1.3. Effect of Melatonin.....	97
4.1.4. Effect of serotonin.....	103
4.1.5. Effect of bromocriptine.....	109
4.1.6. Effect of indomethacin.....	116
4.2. Second experiment.....	122
4.2.1. Serum progesterone level in does treated with HCG.....	122
4.2.2. Serum progesterone level in does treated with HCG in combination with melatonin.....	124
4.2.3. Serum progesterone level in does treated with HCG in combination with serotonin.....	130
4.2.4. Serum progesterone level in does treated with HCG in combination with bromocriptine.....	136
4.2.5 Serum progesterone level in does treated with HCG in combination with indomethacin.....	143
5. CONCLUSION.....	149
6. SUMMARY.....	150

7. REFERENCES.....	160
8. APPENDIX TABLES.....	212
9. ARABIC SUMMARY.....	---
