	PAGE
I. INTRODUCTION.....	1
II. REVIEW OF LITERATURE.....	5
2.1. General characteristics of stored products mites.....	5
2.2. Astigmatid mites.....	7
2.2.1. <u>Acarus siro</u> L.....	9
2.2.2. <u>Tyrophagus putrescentiae</u> (Schrank).....	10
2.2.3. <u>Gohieria fusca</u> (Oudemans).....	14
2.2.4. <u>Chortoglyphus arcuatus</u> (Troupeau).....	15
2.3. Chemical and physical properties of phosphine.....	15
2.4. Toxicity of phosphine to insects.....	18
2.5. Insect resistance to phosphine.....	27
2.6. Toxicity of phosphine to mites.....	30
III. MATERIALS AND METHODS.....	43
3.1. Description of the tested mites.....	43
3.1.1. <u>Acarus siro</u>	43
3.1.2. <u>Tyrophagus putrescentiae</u> (Schrank).....	53
3.1.3. <u>Gohieria fusca</u> (Oudemans).....	59
3.1.4. <u>Chortoglyphus arcuatus</u> (Troupeau).....	64
3.2. Measuring of phosphine concentration.....	69
3.3. Pre-fumigation procedure.....	69
3.4. Fumigation technique.....	70

	PAGE
3.5. Post-fumigation procedure.....	70
3.6. Biological studies.....	70
3.7. Statistical analysis.....	70
IV. RESULTS AND DISCUSSION.....	75
4.1. Toxicity of phosphine to four species of mites infesting stored products in Egypt.	75
4.1.1. Toxicity of phosphine to <u>A. siro</u> L. and <u>T. putrescentiae</u> (Schrank).....	75
4.1.2. Toxicity of phosphine to <u>Gohieria fusca</u> (Oudemans) and <u>Chortoglyphus arcuatus</u> (Troupeau).....	92
4.2. Some biological observations on the survivors of <u>A. siro</u> L. exposed to the median lethal dose of phosphine.....	97
V. SUMMARY.....	103
VI. REFERENCES.....	107
VII. ARABIC SUMMARY.....
