

CONTENTS

No.	Title	Page
1	INTRODUCTION	1
2	REVIEW OF LITERATURE	4
3	MATERIALS AND METHODS	36
4	EXPERIMENTAL RESULTS	57
I	Isolation, purification and identification of fungi associated with cotton seeds before and after delinting ...	57
II	Pathogenicity tests	62
III	Chemical changes in some plant constituents of cotton detached levels due to infection with root rot pathogens	64
1	Sugars and phenols changes	64
2	Changes in chlorophyll (A), (B) and carotenoids	65
3	Changes in electrophoretic protein patterns	67
4	Changes in some electrophoretic isozymes related to resistance	71
A	Esterase isozyme	71
B	Peroxidase isozyme	73
5	Changes in oil content	75
IV	Mycotoxin production by the isolated fungi	76
V	Laboratory studies	77
A	Effect of some fungicides on the growth of the tested fungi.	77
B	Effect of some antagonists on the growth(mm) of the tested fungi	81
VI	Greenhouse studies	82
A	Effect of treating cotton seeds (Giza-86 and Giza-89 cvs) with some fungicides on percentage of dead plants	82
B	Effect of treating cotton seeds (cvs Giza-86 and Giza-89) with antagonists on percentage of dead plants	86
C	Effect of treating cotton seeds (cvs Giza-86 and Giza-89) with some fungicides and commercial antagonists on some growth characters of cotton plants	89
VII	Field trials	95
	Effect of some fungicides and commercial bioagents. On:	
1	Root rot incidence, %	95
2	plant height (cm)	97

3	Fruiting branches of cotton plants (Number)	98
4	Bolls number of cotton plants.(Number)	99
5	Yielded cotton weight (gm)	100
6	Yield of cotton lint (gm)	103
7	Yield of cotton seeds (gm)	105
8	Fiber length (mm)	107
9	Fiber strength.(micron)	108
5	DISCUSSION	109
6	SUMMARY	130
7	REFERENCES	144
8	ARABIC SUMMARY
