List of Tables	
List of Figures	
1. Introduction	1
2. Review of Literature	3
2.1. Definition of drip irrigation system and its components	3
2.2. Advantages and potential problems of trickle irrigation	6
2.2.1. Advantages of drip irrigation system	6
2.2.2. Disadvantage of drip irrigation system	7
2.3. Factors affecting drip irrigation design	8
2.4. Hydraulic characteristics of emitter and emitter evaluation	12
2.4.1 Characteristics of emitter	13
2.4.2 Evaluation of the manufacturing variation of emitter	15
2.5. Effect of discharge rate on soil moisture distribution pattern	17
2.6. Design of drip irrigation system	22
2.6.1 Cost of drip irrigation system	31
2.6.2 Evaluation of drip irrigation design	32
3. Materials and Methods	35
3.1. Hydraulic characteristics of emitter and emitter evaluation	35
3.1.1. Determination of discharge equation of factors	35

	Page
3.1.2. Determination of coefficient of manufacture variation	40
3.2. Effect of discharge rate on soil moisture distribution pattern	40
3.3. Drip irrigation design	40
3.3.1 Effect of drip irrigation design on capital cost of system	44
3.3.2. Design parameters calculations	52
4. Results and Discussion	53
4.1. Hydraulic characteristics of emitter and emitter evaluation	53
4.1.1. Discharge equation factors	53
4.1.2. Coefficient of manufacture variation	59
4.2. Effect of discharge rate on soil moisture distribution pattern	60
4.3. Effect of drip irrigation design on capital cost of system	69
4.3.1. Effect of lateral length on capital cost of drip irrigation system	69
4.3.2 Effect of irrigation cycle on capital cost of drip irrigation system	74
5. Summary and Conclusion	76
6. References	81
7. Appendix	89
8. Arabic Summary
