INTRODUCTION	1
REVIEW OF LITERATURE	2
MATERIALS AND METHODS	25
RESULTS AND DISCUSSION	31
I. Effect of nitrogen and zinc fertilization on dry weight of maize plant organs at different growth stages:	
1. Dry weight of leaves per plant	31
2. Dry weight of stem per plant	39
3. Dry weight of tassel per plant	44
4. Dry weight of grain per plant	48
5. Dry weight of husks plus cobs per plant	50
6. Dry weight of whole plant	53
II. Effect of nitrogen and zinc fertilization on growth characters of maize plant	
1. Plant height	60
2. Stem diameter	63
3. Number of leaves per plant	66
4. Leaf area	68
III. Effect of nitrogen and zinc fertilization on yield components:	
1. Percentage of barren plants	71
2. Number of ears per plant	74
3. Number of rows per ear	77
4. Number of kernels per row	77
5. Number of kernels per ear	79
6. Ear length	81
7. Ear diameter	85
8. Ear weight	88

	Page
9. Weight of kernels per ear	91
10. Weight of 100-kernels	94
11. Shelling percentage	97
12. Weigh of grains per plant	99
IV. Effect of nitrogen and zinc fertilization on yield of grain and crude protein:	
1. Yield of grain per faddan	102
2. Yield of crude protein per faddan	108
V. Effect of nitrogen and zinc fertilization on chemical content of the different parts of maize plant	
1. Effect of growth stages on chemical content	112
2. Nitrogen content	120
3. Zinc content	124
4. N : Zn ratio.....	126
SUMMARY AND CONCLUSION	130
