• Chapter I	
I. General Introduction	1
I.1. Nuclear medicine and radioactivity.....	1
I.1.1. Radionuclides used for diagnostic nuclear medicine.....	2
I.2 Chemistry of technetium.....	5
I.3 Nuclear and radiochemistry of technetium.....	7
I.4 Sources of technetium-99m.....	11
I.4.1 Methods of technetium-99m separation.....	11
I.4.1.1. Types of generator systems.....	11
I.4.1.1.1. Chromatographic generator.....	12
I.4.1.1.2. Solvent extraction generator.....	14
I.4.1.1.3. Sublimation generator.....	14
I.4.1.1.4. Gel generator.....	15
I.4.1.1.4.1. Gel generators based on converting ⁹⁹ Mo into gel matrix....	15
I.4.1.1.4.2. Gel generators based on neutron activation of metallic molybdates.....	16
I.5. ^{99m} Tc-Radiopharmaceuticals	16
I.5.1. Labelling with technetium-99m.....	16
I.5.2. Labelling methods with ^{99m} Tc.....	19
I.5.2.1. Direct labelling method	19
I.5.2.2. Transchelation or ligand exchange labelling method.....	20
I.5.2.3. Bifunctional chelates method.....	21
I.6. Groups of ^{99m} Tc-radiopharmaceuticals.....	24

I.6.1. Pertechnetate ion ($^{99m}\text{TcO}_4$).....	24
I.6.2. ^{99m}Tc -Labelled colloids and particulate.....	24
I.6.3. ^{99m}Tc -Chelates for skeletal imaging.....	25
I.6.4. ^{99m}Tc -Chelates for renal imaging.....	27
I.6.5. ^{99m}Tc -Chelates for hepatobiliary imaging.....	29
I.6.6. ^{99m}Tc -Chelates for myocardial imaging.....	31
I.6.7. ^{99m}Tc -Complexes for brain imaging.....	32
I.6.8. ^{99m}Tc -Complexes for lung imaging.....	34
I.6.9. ^{99m}Tc -Complexes of proteins.....	34
I.6.10. ^{99m}Tc -Blood elements.....	35
I.7. Kit preparation.....	35
I.7.1. Freeze drying.....	36
I.8. Quality control of radiopharmaceuticals.....	38
I.8.1. Determination of the moisture content.....	38
I.8.2. Determination of the Sn(II) content.....	38
I.8.2.1. Iodometric method	38
I.8.2.2. spectrophotometric method.....	39
I.8.3. Determination of the radionuclidic purity.....	39
I.8.4. Determination of the radiochemical purity	39
I.8.5. Biological tests.....	40
I.8.5.1. Biodistribution.....	41
I.8.5.2. Sterility.....	41
I.8.5.3. Apyrogenicity	41
I.8.5.4. Toxicity	42
• Chapter II	
II. Results and Discussion	43

II.1.Synthesis and characterization of 2-N, N (dicarboxyaminoacetyl)	
aminopyridine (I).....	43
II.1.1.Synthesis	43
II.1.2. Characterization of compound (I).....	44
II.2. Synthesis and characterization of 2-N, N	
(dicarboxyaminoacetyl) aminothiazole (II).....	52
II.2.1.Synthesis.....	52
II.2. 2.Characterization of compound (II)	53
II.3.Labelling of Iminodiacetic acid Derivatives with	
Technetium-99m.....	63
II.3.1. Experimental parameters affecting the labelling process.....	65
II.3.1.1.Effect of ligand amount.....	65
II.3.1.2. Effect of Tin (II) content	70
II.3.1.3.Effect of pH the reaction mixture.....	74
II.3.1.4.Determination of radiochemical purity	78
II.3.1.5. Effect of the reaction time at room temp.	81
II.3.1.6. Effect of temperature	85
II.3.1.7. In – vitro stability of ^{99m}Tc-IDA complexes	88
II.4.Biodistribution study of ^{99m}Tc- HIDA derivatives in mice ...	91
• Chapter III	
III.Experimental.....	96
III.1. Materials.....	96
III.1.1. Chemicals.....	96
III.1.2. Solvents	97
III.1.3. Equipment.....	97
III.2. Synthesis of IDA derivatives.....	98

III.2.1. Preparation of 2- N, N (dicarboxyaminoacetyl)	
aminopyridine(I)	98
III.2.2. Preparation of 2- N,N (dicarboxyaminoacetyl)	
aminothiazole(II).....	100
III.3. Labelling of IDA derivatives.....	101
III.3.1. Kit preparation and labelling.....	101
III.3.2. Factors affecting the labelling yield of ^{99m}Tc-IDA.....	101
III.3.2.1. Effect of IDA amount.....	101
III.3.2.2. Effect of tin (II) content	102
III.3.2.3. Effect of reaction time.....	102
III.3.2.4. Effect of pH.....	102
III.3.2.5. Effect of temperature	102
III.3.3 Determination of the radiochemical purity by using	
TLC-SG and ITLC-SG.....	102
III.3.4. Determination of free pertechnetate.....	103
III.3.5. Radiobioassay method.....	104
