|---|-----|
| * Introduction -----                                  |     |
| * Aim of the work -----                               |     |
| <b>Part ( I )</b>                                     |     |
| <b>Review of literature</b>                           |     |
| * Historical perspective-----                         | 1   |
| * Anatomical and physiological considerations-----    | 3   |
| * Etiology of pulmonary hyaline membrane disease----- | 21  |
| * Incidence-----                                      | 26  |
| * Pathogenesis-----                                   | 27  |
| * Pathology-----                                      | 28  |
| * Clinical picture-----                               | 31  |
| * Diagnosis-----                                      | 32  |
| * Differential diagnosis-----                         | 39  |
| * Complications-----                                  | 43  |
| * Management-----                                     | 48  |
| * Prevention-----                                     | 84  |
| *Prognosis-----                                       | 86  |
| <b>Part (II)</b>                                      |     |
| <b>Practical work</b>                                 |     |
| * Material and Methods-----                           | 88  |
| * Results -----                                       | 95  |
| <b>Part ( III )</b>                                   |     |
| * Discussion-----                                     | 162 |
| * Summary-----  | 179 |
| * Conclusion and recommendations-----                 | 181 |
| * Appendix-----                                       | 182 |
| * References-----                                     | 238 |
| * Arabic summary-----                                 |     |
